Yağmur PEHLİVAN

4th-year Management Information Systems student
Hendek, Sakarya, Türkiye | yagmurphlvn.28@gmail.com | (505) 441 66 20

Professional Summary

4th-year Management Information Systems student, focusing on Artificial Intelligence, Data Science, and Software Development. Experienced in developing Artificial Neural Network and machine learning models using Python and R, validating and analyzing datasets with SPSS, and designing relational databases using SQL and ERD. Skilled in JavaScript, GitHub, with hands-on experience in developing data-driven applications and managing software projects. Strong analytical, problem-solving, and teamwork skills developed through academic projects and active participation in student organizations.

Experience

MIS Student, Bilecik Şeyh Edebali Üniversitesi, Merkez/BİLECİK

Aug 2023 to Present

- Data Science and Machine Learning: Python (Pandas, NumPy, Scikit-learn), R (tidyverse, ggplot2), Artificial Neural Network (ANN) Modeling.
- Statistical Analysis: SPSS (Hypothesis Testing, Reliability and Consistency Analysis), Data Validation.
- Database Administration: SQL, ERD (Entity-Relationship Diagram) Design, Data Normalization and Modeling.
- Web Technologies: The ability to transform results from data analysis projects into dynamic, interactive, and responsive dashboard designs that work seamlessly across all devices, using JavaScript and advanced CSS architectures.
- Teamwork and Communication: In the projects given in the school content, I managed the project thanks to my effective communication skills with my teammates and managed complex processes focused on timely delivery using Gantt charts.

IT INTERN, BİEN SERAMİK, Bilecik

Aug 2026 to Sept 2026

Bien — IT Intern
Information Technology Department | 2026

- Gained hands-on experience with **CANIAS ERP**, supporting and observing enterprise-level business processes and information flows.
- Worked within a corporate IT environment, gaining practical experience in **enterprise software, data management, and technology-driven business processes**.
- Contributed to the development and improvement of the **QUA Granite corporate website**, supporting the company's digital presence and web-based business processes.
- Assisted with **IT operations, technical troubleshooting, and end-user support** across the organization.
- Applied knowledge from Management Information Systems coursework to real-world **ERP, database, software, and business process management**.

PROJECT

ARİZİ — Digital Beekeeping Platform

- Developed a digital platform designed to modernize and digitize beekeeping operations. Implemented apiary and hive management, maintenance tracking, location-based hive mapping, and marketplace features. Developed the mobile application using Flutter and Dart. Worked on API integration, data management, and AI-driven feature concepts. Designed an e-commerce component for digital honey sales and product management.

GEZEN — Digital Travel & Route Platform

- Developed a digital travel platform focused on route discovery, trip planning, location-based recommendations, and social interaction. Implemented interactive maps, ready-made routes, saved content, messaging, and content-sharing features. Worked with Firebase for authentication, data storage, and application functionality. Developed location and route-based features while focusing on data management and user experience.

Education

Bilecik Şeyh Edebali University, Bilecik

Management Information Systems (Bachelor's Degree), Sept 2023 to Present

- **GPA:** 3.48 / 4.00
- **Core Competencies:** Database Management, Artificial Intelligence, Programming, System Analysis & Design, and Software Development.
- **Data & Technical Stack:** End-to-end data management expertise spanning database design (ERD), structuring, and analysis using Python, R, SQL, and SPSS.
- **Career Focus:** Specialized interest in relational database design, data science, and artificial intelligence engineering, focusing on building reliable and sustainable data-driven systems.

Skills

• Python, R, SQL, Flutter, Dart, JavaScript, Firebase, AKINSOFT Wolvox ERP, CANIAS ERP, SPSS, Git, GitHub, Artificial Intelligence, Machine Learning, Data Science, Data Analysis, Database Management, Relational Database Design, API Integration, Software Development, System Analysis & Design.

Languages

English, Turkish, German
